EVERYTHING YOU NEED TO KNOW ABOUT

Re-Verification

Federal law mandates that all Medicaid providers must be re-verified every five years to ensure that provider information is accurate and current. It has been over five years since the implementation of NCTracks, which means there are many providers who will need to complete re-verification.

Notification

Providers will receive notification in the Message Center Inbox of the secure NCTracks provider portal when it is time for re-verification. The notification has the ID PM16000-R0053 with the description “Re-verification Letter.” In addition, the NC Division of Health Benefits (DHB) has posted a list of the providers who are due for re-verification on the DHB Provider Enrollment page.

Timing

Providers have 70 days to submit their re-verification/re-credentialing application. Also, updates to owners’ and managing employees’ information (address, phone number, email) are incorporated into the re-verification application, instead of requiring a Manage Change Request (MCR). Note: A re-verification application cannot be submitted for an NPI that has an MCR currently under review, and unlike the previous process, the due date of the re-verification will not be delayed/postponed.

Fees

There is a $100 North Carolina application fee for re-verification. In addition, when applicable, providers may be required to pay a federal fee, which is $595 for calendar year 2020. Fees must be paid when submitting the re-verification application. Refer to the Provider Permission Matrix (PPM) on the NCTracks Provider Enrollment page to determine if the federal fee is required. For more information refer to the NCTracks Federal Fee and NC Application Fee FAQ page.

Fingerprinting

Fingerprint-based background checks are required for all high categorical risk providers and owners who have a 5% or greater ownership interest. The PPM also details whether this is a requirement for your provider type. Refer to the Fingerprinting FAQ page for more information.

Consequences & Remedies

Failure to submit the re-verification application by the due date will result in suspension of the provider in NCTracks. If the re-verification application is not submitted within the suspension period, the provider will be terminated in NCTracks.
