

Outpatient Specialized Therapy Providers

Type of diagnosis codes used:	ICD
Type of procedure codes used:	CPT
Prior approvals affected by ICD-10?	Yes
Claims affected by ICD-10?	Yes
Special considerations for this provider type:	Beginning with dates of service on and after October 1, 2015, the ICD-10 diagnosis code Z51.89 replaces the individual ICD-9 V codes for each outpatient specialized therapy, but this code will not be required on the claim as a secondary diagnosis. For dates of service starting October 1, the rendering provider taxonomy will determine the use of revenue codes and CPT codes for the appropriate therapy.
For more information:	https://www.nctracks.nc.gov/content/public/providers/ICD10/ICD10-announcements/OPST-Chgs-Coming-With-ICD10.html
Examples*:	<p>Beneficiary sees the OT (rendering provider taxonomy 225X00000X) on May 5 and the OT bills for CPT Code 97530, and the beneficiary sees the PT (rendering provider taxonomy 225100000X) on the same day and the PT bills for CPT Code 97530.</p> <p>ICD-9: OT would use secondary diagnosis code V57.21 and PT would use V57.1</p> <p>ICD-10: No secondary diagnosis code required. Both claims pay even though the CPT Code and the date of service match because the rendering provider taxonomy and NPI are different.</p>
