Preface

Companion Guides (CGs) may contain two types of data, instructions for electronic communications with the publishing entity (Communications/Connectivity Instructions) and supplemental information for creating transactions for the publishing entity while ensuring compliance with the associated ASC X12 IG (Transaction Instructions). Either the Communications/Connectivity component or the Transaction Instruction component must be included in every CG. The components may be published as separate documents or as a single document.

The Communications/Connectivity component is included in the CG when the publishing entity wants to convey the information needed to commence and maintain communication exchange.

The Transaction Instruction component is included in the CG when the publishing entity wants to clarify the IG instructions for submission of specific electronic transactions. The Transaction Instruction component content is limited by ASC X12's copyrights and Fair Use statement.

1. Transaction Instruction (TI) Introduction

1.1 BACKGROUND

1.1.1 Overview of HIPAA Legislation

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carries provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (HHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and plans. HIPAA directs the Secretary to adopt standards for transactions to enable health information to be exchanged electronically and to adopt specifications for implementing each standard. HIPAA serves to:

- Create better access to health insurance
- Limit fraud and abuse
- Reduce administrative costs

1.1.2 Compliance According to HIPAA

The HIPAA regulations at 45 CFR 162.915 require that covered entities not enter into a trading partner agreement that would do any of the following:

- Change the definition, data condition, or use of a data element or segment in a standard
- Add any data elements or segments to the maximum defined data set
- Use any code or data elements that are marked “not used” in the standard’s implementation specifications or are not in the standard’s implementation specification(s)
- Change the meaning or intent of the standard’s implementation specification(s)

1.1.3 Compliance According to ASC X12

ASC X12 requirements include specific restrictions that prohibit trading partners from:

- Modifying any defining, explanatory, or clarifying content contained in the implementation guide
- Modifying any requirement contained in the implementation guide

1.2 INTENDED USE

The Transaction Instruction component of this companion guide must be used in conjunction with an associated ASC X12 Implementation Guide. The instructions in this companion guide are not intended to be stand-alone requirements documents. This companion guide conforms to all the requirements of any associated ASC X12 Implementation Guides and is in conformance with ASC X12’s Fair Use and Copyright statements.

1.3 INTENDED AUDIENCE

This companion guide is intended for the business and technical users, within or on behalf of trading partners, responsible for the testing and setup of electronic claims submissions to NCTracks. In addition, this information should be communicated to, and coordinated with, the provider’s billing office in order to ensure that the required billing information is provided to its billing agent/submitter.

1.4 PURPOSE OF COMPANION GUIDE

The companion guide is to be used with and to supplement the requirements in the HIPAA ASC X12 Implementation Guides, without contradicting those requirements. Implementation Guides define the national data standards, electronic format, and values for each data element within an electronic transaction. The purpose of the companion guide is to provide trading partners with a guide to communicating NCTracks-specific information required to successfully exchange transactions.

The primary purpose of this document is to assist the trading partner with the appropriate use of the transactions; it is not intended to be a billing or policy guide.

1.5 ACKNOWLEDGEMENTS

For all inbound transactions, a 999 Acknowledgement report will be sent to the trading partner's OUTBOX for retrieval. This report serves as the acknowledgement of the submission of a file. Typically, 999 Acknowledgement reports are available within moments of submission.

1.6 TRADING PARTNER AGREEMENT SETUP

Refer to Section 2.2, "Trading Partner Registration," of the NCTracks Trading Partner Connectivity Guide.

1.7 TESTING

NC DHHS (DHB, DMH, and DPH) requires testing, or third-party certification, prior to approving a trading partner to submit claims in production. Once trading partner claims are in production, NC DHHS (DHB, DMH, and DPH) reserves the right to require re-testing if it is determined that the trading partner is receiving/generating an unacceptable volume of errors.

Refer to Section 3, "Testing and Certification Requirements," of the NCTracks Trading Partner Connectivity Guide.

2. Included ASC X12 Implementation Guides

The following table identifies the X12N Implementation Guides for all of the transactions supported by NCTracks. Companion guides are available for each of the transactions.

Section 3 of this document provides information specific to the 837P Professional transaction set, as defined in the ASC/X12N 005010X222 Health Care Claim: Professional (837P) Technical Report 3 (TR3) dated May 2006, and updated by:

4. TI Additional Information

4.1 BUSINESS SCENARIOS

The 837P is used to submit Professional claims, adjustments, and voids.

4.2 PAYER-SPECIFIC BUSINESS RULES AND LIMITATIONS

NCTracks expects a segment terminator (~) at the end of each segment, as defined in Section B.1.1.2.5, Delimiters of all (837P, 837D, 837I, 270/271, 276/277, 834) TR3 documents. In addition:

- NCTracks does not accept Carriage Return (CR), Line Feed (LF), or Carriage Return Line Feed (CRLF) characters as segment terminators.
- NCTracks accepts files with or without Carriage Return Line Feed (CRLF) characters, but if the CRLF is sent, a segment terminator is still required.
- There should not be any spaces or any junk characters after the end of the IEA segment.
- Only one ISA IEA is allowed in the file.

Files without a segment delimiter, with an unidentified segment terminator, or with spaces after the IEA segment will receive a negative TA1 and will not be processed.

4.3 SCHEDULED MAINTENANCE

NCTracks maintenance will occur Sunday morning from 12:01 a.m. through 4:00 a.m. NCTracks will not be available to submit files during this time.

4.4 FREQUENTLY ASKED QUESTIONS
